## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claim 25 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 25 recites the limitation ""said removable program module" in line 1. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 19-22, 25-27, 30 and 31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yilmaz et al. (5,715,156).

Yilmaz et al. disclose a method and apparatus for providing AC or DC power for battery-powered tools in Figures 2-4. An AC to DC converter 23, DC-to-DC converter 25 in Figure 2, A DC input, AC input and filter 30 in Figure 3 and removable program module and set of resistors Figure 4.

4. Claim 19 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Krall (5,621,299).

Krall discloses a rechargeable battery power supply with load voltage sensing selectable output voltage and a wrist rest in Figure 1. An AC to DC converter 63, a DC-to-DC converter 35, a filter 49 and a DC outputs 21 and 31 and a second DC-to-DC converter 65.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 23, 24, 28 and 29 rejected under 35 U.S.C. 103(a) as being unpatentable over Yilmaz et al. (5,715,156).

Yilmaz et al. disclose the claimed invention except for the range of output voltage. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the range of output voltage, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

### ***Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 19-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,700,808. Although the conflicting claims are not identical, they are not patentably distinct from each other because the application claims are broader than the patent claim.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Simonelli et al. disclose a method and apparatus for providing uninterruptible power using a power controller and redundant power controller. Chen discloses a backup power stage associated with a dual input power supply and method of operating the same. MacDonald et al. disclose a dual input AC and DC power supply having a programmable DC output utilizing single-loop optical feedback.

10. This is a continuation of applicant's earlier Application No. 10/072,074. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
